

## **How the corona waves behave and how the responsibility is perceived by the state leaders**

Extract from the 748th contact of 27 July 2020

**Billy:** Thank you, that should be clear and detailed enough. For my part, I was only brief with my explanations, but my explanations were understood nevertheless. Your clarification - but I find it much better - thank you. But what I want to ask you, my friend, although we actually didn't want to talk about Corona anymore, is something that is on the one hand unclear and on the other hand wrong: Recently, several TV stations and states have claimed that the 2nd wave of the Corona virus is now spreading through the country, whereas in Hong Kong there is already a 3rd wave spreading, which brings disaster. In addition, I notice daily in the latest news from Swiss and German news channels, as well as worldwide, that false statements are constantly being made about the number of cases, corona infections and corona deaths, which contradict yours.

**Ptaah:** What I can explain and clarify is something that will probably be of interest to many people, which is why you should spread the whole thing on the FIGU website in order to counteract the false reports that are spread irresponsibly and misleadingly towards the people. But it also concerns what is claimed about the alleged 2nd and 3rd corona wave, whereby such false reports are not infrequently made by virologists and immunologists, but also by pathological know-it-alls, conspiracy theorists and fear propagators, etc. Both in this respect and in dealing with the corona pandemic, the majority of terrestrial human beings are obviously just as unteachable as the majority of those responsible for the state, who should be concerned for the safety of their peoples, but they are not. This is not because they consider the running and operation of economic groups to be more important and much more important than the health and lives of the people. It is also true, however, of the majority of the population itself, which, contrary to its respect for health and life, indulges in its various forms of pleasure and indulges in its various forms of indulgence in a totally irresponsible and indifferent manner, and as a result the corona epidemic cannot be stopped, but is spreading and claiming more and more victims. By compulsively maintaining the largely old ways of working of the economic corporations, instead of adjusting the whole thing to a lower and health and safety-conscious stock of workers and adequate production, everything is ruthlessly continued in the old style, with the consent of the state leaders, who would be responsible for devising, enforcing and observing all necessary health and safety measures to prevent the epidemic from spreading further.

As far as the spread and the worldwide spread of the Corona disease is concerned, the

1. wave, which, depending on the safety behaviour of the earthlings, flattens out, rises again and even rises, only to fall off again strongly when the safety measures are more strictly observed, after which, however, when these measures are again relaxed or neglected, the wave spreads further and further. So the fact is that so far the 1st wave is still active, which is still expanding and only comes to an end when it reaches its most intensive and highest level worldwide, then flattens out and reaches an earth-wide low. And only then a 2nd wave can build up and start to spread again. With such a 2nd or possibly even 3rd wave, it can again spread worldwide as a pandemic, but it is also possible that only individual countries will be affected and the disease will again spread only as a national epidemic. Counter-statements correspond to confused untruths or effective stupidity, which in any case means and arises from the fact that and when man does not consciously and rationally analyse an incidental matter, gains inconclusive insights and thus remains ignorant and incapable of making an informed judgement. This, if man is capable of conscious rational thinking but does not use it, then a state of stupidity arises, and this state prevails in the majority of peoples as well as in their leaderships, which is why they do not seek the necessary health and safety measures and cannot prescribe or enforce them, which results in many victims.

**Billy:** In the last few months you have often said in private, as you have recently said again, it was probably still in the month of June, that already in a short time, in the near future or so, due to the currently still grazing and effective 1st Corona pandemic wave, which is rolling all over the world, by autumn there will be close to or more than 22 million people infected by the Corona virus and more than one million Corona epidemic deaths.

**Ptaah:** Unfortunately, this is the result of this way of thinking, which is the fault of all those of the majority of the state leaders who, in their inability to lead, initiated and continue to initiate the relaxation or lifting of the lockdown orders, thereby leaving the people free to decide for themselves whether or not they want to be subject to personal security measures. This has now led to a situation where the majority of the population's ignorant, stupid and careless people, in indifference, stupidity and recklessness, continue to use the lifting of the lockdown stupidly as before, which means that tens of thousands of people around the world are once again being re-infected by the corona virus, provoking and causing their own deaths, as many others have done before and to date. And what is now going to happen in this respect in Europe, which until recently was spared from large numbers of infections and victims as a result of the more or less effective and state-imposed safety precautions, will now, as a result of the end of the lockdown, also be strongly affected by the corona epidemic and claim many victims. However, this is also happening worldwide and has already begun, but it is only now that the primary wave or fundamental wave, which is still expanding worldwide, will peak in Europe and quickly claim large masses of infections and fatalities.

**Billy:** Unfortunately this will also be in Switzerland, as you said recently.

**Ptaah:** This is unavoidable, because in your homeland, too, those state officials who would be responsible for the general security and health and thus also for the protection and welfare of the people and their lives, consist of absolutely incompetent male and female persons of the federal government and, as a failure in state leadership, should never be allowed to hold such a position. All those loudmouths of the state leadership who would be responsible for civil protection with regard to all necessary protective measures against the prevailing corona epidemic, which in Switzerland concerns the Federal Councillors of both sexes, are incapable of their great responsibility to recognize, collect and implement the necessary precautionary measures against the corona virus and make a mockery of themselves. This is because they are not aware of their responsibility and duty to maintain the health and well-being of the people and they are not able to identify the precarious danger of the corona virus, nor to devise the necessary precautions against the disease and therefore cannot have any carried out. The mere fact that in Switzerland the state leaders and authorities responsible for the protective measures are acting irresponsibly, namely by omitting a general obligation to wear protective masks or the obligatory wearing of protective masks at all places where there is a precarious risk to the health and safety of all persons, is more than just recklessness. And the fact that for the entire population of all states, including Switzerland, all group gatherings are not strictly forbidden, that there is no closing order for amusement parks, no prohibition of public amusement events and commemoration ceremonies etc., and no prohibition of holiday travel etc., will continue to claim many victims of the Corona epidemic. And this will continue to be the case in relation to the whole of all other appropriate distance from person to person, wherever this is necessary and where the need for protection makes it indispensable. But if all this is not done, then this kind of inaction is irresponsible, because the need to comply with these rules exists wherever people are forced to do things that cannot be avoided and are in close proximity to other people, such as on public transport, in shopping centres, at work, etc., as well as in postal and banking services and, in general, in all busy places, etc.

**Billy:** You've said all this about other things as well, as I remember.

**Ptaah:** This is indeed the case, but it is true for all leaders worldwide, with only a tiny minority of people who would have real leadership qualities, but they are not able to do anything against the power-hungry. If data are published worldwide that refer to the corona pandemic, then it can be explained by the fact that all over the world, health control institutes report false data of infected and dead people in relation to the epidemic, because not all cases are recorded and not reported. This is also true in Switzerland, where the infection and death rates are much higher than those reported and also mentioned publicly. However, this is true for all countries worldwide, such as Germany in Europe, where the death rate has been over 11,000 for some time, whereas only around 9190 deaths are officially reported at present. Also the so-called case numbers concerning the corona epidemic, which are reported daily, do not correspond to the facts. What

is that the total number of corona infections and corona deaths is 11.4 times higher than is generally wrongly calculated, because all effective facts are neither really recognized nor researched.

It is unavoidable to mention that the earthly technology of all kinds, which is highly praised by the earthly people, is indeed still so deficient and underdeveloped that with it there is no possibility whatsoever to analyze and register all things very exactly and precisely down to an individual person, as it is possible on the other hand with our much higher and further developed technology. According to this fact, we also have decidedly better and moreover extremely exact and precise records of each and every criterion that we investigate and check, so that we are able to find out and register every single person on earth who is infected by the corona virus or who has died, which is contrary to the whole earthly system.

'High technology' is not yet possible and will not be possible for several centuries. The 'modern' technology alone, which is still in the early stages of a higher development, represents a great danger for the continued existence of mankind on earth, because as a result of the underdevelopment of consciousness all possible old and new inventions of all kinds, values and unvalues are being transformed into weapons, destruction, extermination and extermination operas and thus disaster, wars, murders and terror are carried out.

With regard to all earthly 'high technology', which is arrogantly called 'high technology' by the earth people, our plejaric-sonaerian effective high technology is absolutely superior to any earthly technology. This corresponds to a criterion and a characteristic that is relevant for a distinction, evaluation or decision with regard to every technical evolution and its peaceful, progressive, logical and logical fulfilment, and thus especially oriented towards the laws of creation. However, this is impossible for terrestrial human beings with regard to the existence as well as the use of the still deeply underdeveloped terrestrial technology in all its types, forms and products as well as with regard to its use in any selection of persons, objects, characteristics, occurrences or subjects etc.

Is the whole thing considered since the beginning of the corona epidemic, especially as a result of ignorance of the facts - which are considered by terrestrial virologists, immunologists, epidemiologists and medical professionals, etc. that the corona danger was not researched either from the beginning of 2019, when the corona virus first appeared, or in the months after that until the end of November, so it could work unnoticed for months and cause many infections and deaths, until the first public case became known in Wuhan by a certain coincidence.

It should also be mentioned that certain sections of the responsible state leaders and authorities in all the countries of the world have recklessly judged the whole of the danger posed by the corona virus to be trivial and insignificant or very weakened and harmless, and in some cases irresponsibly still consider it harmless. But this was and is also the case in large parts of the population, especially with pathologically stupid people, who walk along indifferently and thoughtlessly, as well as with confused know-it-alls and completely irresponsible conspiracy theorists, through whom everything degenerates in such a way that all indispensable safety precautions are inevitably trivialized and disregarded. Consequently, the necessary duty to wear protective masks is largely abolished, ridiculed and furthermore, the state authorities allow the population to decide on different places, so that such protective measures resp. the wearing of protective masks can be determined by the personal decision of the individual persons, which causes corona infections for many people on earth and also causes an increasing number of corona deaths, which will soon exceed the official million mark. This will soon follow the 20 million officially named infections, which will already be revealed in one week. But this will not lead to a fact of reason, because the whole economy and the commerce connected with it as well as the financial power will remain the more important side of all unreasonableness and will therefore continue to take over, contrary to the necessary security regarding the health and life of the earthly people in general. Thanks to this irrational and illogical thinking, acting and behaviour, the corona death rate will inevitably rise alarmingly fast and - in addition to the corona death victims who have exceeded the million mark for some time now - the number of millions of deaths will also be officially mentioned very quickly.

In addition to all that has been said, it must unfortunately be said that the majority of those responsible, the state powers and authorities - in order to promote the will of the economic lobby or of all the institutions, companies and corporations and with regard to measures concerning the production and consumption of all economic goods - are nevertheless leaving the population in the dark about the great danger of the corona epidemic. And the rest of the evil is done by playing down the danger of corona, by neglecting any duty to wear a protective mask and by leaving it to the will of the majority of citizens who are not capable of rational thought and knowledge. Our alarming observations in this regard have been made by the majority of the heads of state and authorities on earth.

hits everything of unreasonableness, egoism, irresponsibility and enrichment to the detriment of humanity that we have ever encountered in any people of other worlds. The majority of all female and male powers, as well as the majority of all authorities, which we have observed worldwide and in general since the end of the last world war, continuously classify extremely exact analyses and from them appropriate and undoubted findings, frighteningly only the profound knowledge and the result allow us to conclude that the worldwide majority of all powers and authorities are unworthy and incapable of their office. His leadership intelligence in state and government does not correspond to the necessarily comprehensive qualities that would be necessary for a correct and for the benefit of mankind valuable welfare and progress as well as for safety and health. Our investigations, analyses and findings have shown effectively that the majority of all those exercising state power and, equally, the majority of public authorities are not only extremely deficient in terms of their intelligence, their extremely inadequate and decisive quality of decision-making, leadership and action, but also correspond to an inferiority similar to that of uneducated adolescents.

If the whole negative of the state leaders and authorities is analyzed, then no real generally useful values for the people can be recognized in them, but only selfish ends of their own, through which the majority of the powerful and senior officials rise and shine in their own glory and feel adored, but truly do nothing for their people.

However, positive decisions are made very rarely, and consequently it is almost impossible to observe a person wearing a protective mask in public, as would be a matter of urgency and as we have recommended, and which is generally followed by FIGU members throughout the world, as we can see from our frequent observations. In many cases, these members are the only ones within a wide radius who responsibly follow the advice of the mask wearers, while the majority of the population carelessly walks around without masks, irresponsibly does not keep the necessary distance to other people and, moreover, forms groups, thus making corona virus infections inevitable and increasing. The fact that the responsible state leaders and authorities do not take any action against this and do not make the wearing of protective masks an obligation, does not only mean a reckless omission of a necessary regulation, but an irresponsibility without equal, because with regard to the omission of all necessary safety obligations towards the population and its health, this is not only irresponsible, but also criminal.

**Billy:** You can say that again. As a rule, the majority of those responsible for this or similar situations only make a lot of stupid remarks and sayings when they come out in public or are questioned by inquiring journalists on the matter. The rulers who are influenced in this way believe themselves to be big and clever, but they only spout stupid stuff, as I recently observed and listened to on television again with some men and women from our Federal Parliament and rulers from other countries. It was the same with Germany, the EU dictatorship and US oafs. And what there was talked about stupid and inconsiderate trivialities, incomprehension, irresponsible nonsense and insignificance, made me blush with shame, also because such people are allowed to exercise state power, although they are absolutely incapable of doing so and they would be better off doing an intelligent and circumspect job as manual labourers.

**Ptaah:** Such observations and hearings are also under our control, and in regard to the evaluations of the statements made to the people by various state officials and members of the authorities, it must be said that they are very often not only extremely banal but effectively ridiculous and prove the unsuitability of the persons concerned with regard to their position of state or authority. But now, Edward, dear friend, I must go. Farewell and protect yourself.

Give my greetings to the entire FIGU community around the world, and they should all follow my advice, and follow our recommendations regarding the above safety precautions, so that they can protect themselves from the corona virus with a certain degree of safety by wearing protective masks, and by keeping their distance from other people on all their journeys and errands, etc., and wherever they go.

Goodbye.
